

PROJECT MANAGER

Fraser River, Pile & Dredge (GP) is the leading marine construction and dredging company in Western Canada. FRPD's versatile fleet of cutter suction and hopper dredges, spud barges, cranes, dump barges, flat scows and extensive list of support equipment is ready to complete all types and sizes of Marine Construction, Environmental Remediation, Dredging and Land Foundation projects. FRPD is seeking an enthusiastic Project Manager to work within the Dredging team. We are looking for a dynamic individual to be directly accountable for all aspects of project performance; focus on contract negotiations, contract management, claims settlement; and provide oversight during execution phases and budgets & forecasting support. Below are a few of the responsibilities for this role:

Key Responsibilities:

- Project Management of dredging or environmental remediation projects, which includes but is not limited to:
 - a) Estimating
 - b) Preparation of safe work plans and hazard assessments of the work to be undertaken
 - c) Communicating and providing direction and support to project team & field crews
 - d) Developing strong working relationships with the Partners, Clients and unionized labour force
 - e) Preparing project related client invoices and providing supporting documentation
 - f) Approving all material and manpower requirements via invoices and/or time sheets for the projects being managed
 - g) Approving all timesheets, purchases and invoices related to the project
 - h) Ensuring all permits and permissions are in place prior to the work commencing, including but not limited to dredging permits, and/or communication plans etc
 - i) Overseeing and ensuring all Health, Safety & Environmental requirements/inspections are met on site
 - j) Ensuring that required material suppliers and/or sub-contractors are provided with ample time and knowledge of the work that is to be completed

Required Skills:

- Excellent written & verbal communication skills
- Strong leadership qualities
- Direct knowledge and experience in all facets of dredging, (hopper, cutter suction, clamshell, sand stockpiles and surveys)
- Great work ethic, able to multi-task and strong interpersonal skills
- Motivated and committed to achieving dredging division goals while supporting other divisional goals as well
- Excellent attention to detail and the ability to recognize discrepancies
- Creative, with superior organizational skills, results oriented and committed to team success
- Ability to read and interpret design drawings and specifications
- Strong computer skills (Microsoft Office, Adobe, AutoCAD)
- Willingness to work outside of Lower Mainland, as required

Qualifications:

- Degree or Diploma in Civil Engineering
- 7+ years related dredging, environmental remediation or marine construction experience
- Eligible for ASCT or P.Eng. registration in the province of BC

Qualified candidates are invited to submit their application with a cover letter to careers@frpd.com (please state job title in email subject line)

We thank all applicants for their interest; however only those selected for an interview will be contacted.
